

## USB Drives can do a lot to help your business

- **Distribute product information** directly to customers and clients including product catalogs, price sheets, photos, PowerPoint and demonstration videos. Every computer/Laptop has a USB port, so there is no issue with compatibility.

- **Save on printing and shipping costs** by producing a digital catalog that is easy to ship at a moment's notice.

- **Your company's logo printed** on a customized USB flash drive that will be used over and over again by your recipients. It is unlikely anyone would toss a useful flash drive in the trash.

Size available: 1GB, 2GB, 4GB, 8GB, 16GB and 32GB

**"We are here to help continue your company's success by adding increased value to your brand."**

### DVD REPLICATION SERVICES WITH RETAIL PACKAGING

**Are you reaching your entire target audience?** In 2013, the U.S. Census Bureau reported only 74.4 percent of all households reported Internet use. That's over 900,000 households that cannot view online data. A mass mailing of a DVD in bulk to reach just 10% of that audience is under \$0.34/ea. That is less than a First Class Stamp not to mention a catalog which can be included on the DVD.

**digitalCDR.com, Inc** has been in business since 2000. This successful accomplishment is because we make buying easy and hassle free for our customers.

We are not contacting you to simply solicit our services. We want to help you reach your target audience through a physical product you can distribute. It gives us great satisfaction to know we have added value to your company through our services. That's why we love what we do.
